UBAM – US HIGH YIELD SOLUTION UBAM – GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION

Luxembourg, 28 June 2023

Dear Shareholders.

The Board of Directors of UBAM informs you of the decision taken by circular resolution, i.e.:

The sub-fund UBAM – US HIGH YIELD SOLUTION (the "Absorbed Sub-fund") will merge with the sub-fund UBAM – GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION (the "Absorbing Sub-fund"), the latter absorbing the former, in accordance with the type of merger described in article 1 point 20 a) of the law of 17th December 2010.

This merger is motivated by the fact that the Absorbed Sub-Fund's assets are low, and the Absorbing Sub-Fund offers to shareholders a similar High Yield investment policy with the main regional allocation in the US high yield market and with similar SRI and reduced fees level. Both Sub-Funds are classified as Article 8 under the Sustainable Finance Disclosure Regulation ("SFDR").

The merger will become effective on 4 August 2023 (the "Effective Date").

The investment policies and objectives of the Absorbing and the Absorbed Sub-funds differ as follows.

UBAM - US HIGH YIELD SOLUTION

This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

UBAM – GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data providers rating, an internal rating may be assigned by the Investment Manager. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in the sub-fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

Exclusions applicable to the Sub-Fund, according to the UBP Responsible Investment policy (available on https://www.ubp.com/en/investment-

expertise/responsible-investment). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the sub-fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.

ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:

External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuers.

A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

Preference for Green bonds. The preference for Green bonds should be considered as an objective
